

C2M2A partners in Canada-UK discussions around Critical Material Innovation

On Thursday, May 19th, the British High Commission alongside [Innovate UK KTN](#) and [Natural Resources Canada | Ressources naturelles Canada](#), and the support of C2M2A, hosted a day of roundtables and discussions on Critical Minerals and Materials at Earncliffe. In Ottawa.

The roundtable was part of a series of events relating to the UK's [#GlobalExpertMission](#) (GEM) to Canada. The GEM primarily focuses on critical material supply chain and cover the following areas: Extraction industries and processing, manufacturing processes, circular economy and policy alignment. C2M2A members SRC, Search, Cheetah, GeoMega and C2M2A itself participated on the focused panels as well as more than spirited audience interaction with the panels and during networking breaks.

Strong partnerships and alliances will be needed ahead regarding the future growth the full suite of critical minerals and materials. C2M2A's efforts with national, bilateral and global initiatives (e.g., AccelerateZEV, BMAC, UK & EU programs, REIA, ISO and others are helping enable opportunities in this space for Canada.
